

Creative Problem Solving Skills

...proven tools & techniques for generating creative ideas
and solving problems

Workshop Overview:

Creative Problem Solving (CPS) is a highly practical one, two day workshop that helps employees of all levels address their difficult work challenges with creativity and practical innovation. This program provides a straightforward, step-by-step creative problem-solving process that will enable participants to return to work with usable skills and techniques to apply to any work situation.

CPS is not a lecture format. Rather, it is an experiential session that allows people to tie the process and techniques to their real-life situations. Right away.

Workshop Objectives:

This workshop will help participants to...

- learn a process and techniques for generating ideas and solutions when needed
- better understand the kinds of interactions and behaviors that support true collaboration and creative thinking
- explore the importance of idea development. apply the problem-solving process to situations and challenges faced by participants

Workshop Process:

This workshop uses highly interactive and hands-on learning methods. Participants are actively involved solving problems creatively right from the start.

Who Should Attend:

CPS is designed for the individual who needs new answers to new or old problems. This includes:

- both new and experienced team leaders, supervisors and managers
- project leaders and individual contributors
- intact teams that must develop a common problem solving language and approach
